Dear Sirs,

I would like to raise my concerns and objections to one of the Amendments proposed to the 2030 Local Plan.
As in my previous submissions I object to the housing developments proposed in the area of Bittams Lane and the use of Green Belt land with the consequential impact on the environment and social issues.

An Amendment proposed shows an increase in Traveller Pitches on the land in Parcel C on Bittams Lane. This area, I understand, is Green Belt and I would expect any approved development of this land to be sympathetic to the location. Unfortunately, experience has shown that such allocation of land has led to that of a more Industrial/Commercial use rather than Residential. This I believe is not in keeping with this area.

I would be grateful if this Amendment could be rejected.

Regards
